Johnson & Johnson
Redwood City, CA

RE: Software Engineer Intern

Dear Hiring Manager,

I was excited to learn about the Software Engineer Intern position with Johnson & Johnson posted on your company website and would greatly appreciate your considering my placement in this role. I've closely reviewed the needs and requirements for this role and believe that my qualifications have prepared me to contribute immediate value to your organization.

While in school, I worked hard to hone my skills in programming in a variety of languages in addition to gaining an analytical mind. Not only do I believe that my interdisciplinary knowledge in both the field of design as well as computer science will be helpful, I am also focused and attentive to detail when addressing high-volume task loads to meet deadlines. I am inspired by making a positive impact by applying my knowledge in web-based services, statistics and machine learning and my problem-solving abilities allow me to address challenges to achieve results.

Please review my attached resume for more details on the following qualifications: •Python
•Machine Learning •SQL and NoSQL • AWS Web Services

My academic experiences have served me well in developing my time-management, teamwork, and motivation skills. I work well to use clear and concise communication to interact professionally with co-workers, supervisors and customers. I look forward to speaking with you regarding my skill set and attributes which I believe will serve as an asset to support Johnson & Johnsons' goals. Please take a moment to review my attached resume. Thank you for your time and consideration.

Sincerely,
Will Lin
